CNC Machining Operator – 3rd shift

Description

About Us

Metals Engineering is an established leader in industrial heat treatment services, dedicated to quality, safety, and customer satisfaction. As we continue to grow, we are looking for a reliable and motivated **CNC Machining Operator** to join our team.

Position Overview

The Machining Technician will be responsible for maintaining production machines, measuring parts for conformity, and ensuring consistent quality output. Training will be provided.

3rd Shift – Monday – Friday, 11:00 PM – 7:00 AM

Responsibilities

Duties & Responsibilities

- Identify malfunctions or out-of-tolerance machining.
- Inspect and measure completed production units to identify defects.
- Start or restart equipment after power outages or interruptions.
- Maintain a safe and orderly production area.
- Perform other related duties as assigned.

Qualifications

Required Skills & Abilities

- Has CNC machining experience.
- Strong understanding of or ability to quickly learn production equipment.
- Analytical and problem-solving skills.
- Positive attitude and strong work ethic.
- Ability to demonstrate a logical, detailed, and disciplined approach to equipment operation.
- Commitment to teamwork, supporting team members across shifts and locations.
- Willingness to learn and grow, both personally and professionally.

Education & Experience

- High school diploma or equivalent required.
- Machining experience preferred but not required (training provided).

Physical Requirements

- Physical ability to operate and maintain machines.
- Prolonged periods of standing, walking, bending, and stretching.
- Must be able to lift up to 40 lbs. as needed.
